DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3 and 4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 3, the word "means" is preceded by the word(s) "circuit" in an attempt to use a "means" clause to recite a claim element as a means for performing a specified function. However, since no function is specified by the word(s) preceding "means," it is impossible to determine the equivalents of the element, as required by 35 U.S.C. 112, sixth paragraph. See *Ex parte Klumb*, 159 USPQ 694 (Bd. App. 1967).

Regarding claim 4, the reference to claim 1 creates confusion. Claim 1 claims a small remote control switch housing console as indicated by the transitional phrase "containing". Claim 4 recites "remote control on-off switch and relay as described in claim 1" and "said remote control switch/relay circuit in claim 1". Both recitations make reference to certain elements of claim 1 and not to the subject matter of claim 1 in its entirety. An improper dependent claim is one that does not incorporate all of the limitations of the claim to which it refers. Thus, claim 4 is unclear and fails to clearly set forth the metes and bounds of the claimed invention.

3. The following art rejection will be made as best understood by the Examiner in light of the above 35 USC 112 rejections.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 3 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Platzer Jr. (US patent 3,514,626).

As per claim 3, Platzer teaches a small remote control" switch housing console containing an electrical on-off switch and relay, incorporating a circuit means whereby when power is interrupted to said remote control switch/relay, said switch/relay will revert to a "closed" electrical position regardless of said switch/relay's position prior to said power interruption (Figures 1-3; col. 1, line 55+).

As per claim 4, Platzer teaches the combination of a series and parallel wired combined electrical "piggyback" plug/socket assembly and a single lead three conductor power cable, said cable providing both operating power and load switching connection to "remote control" on-off switch and relay as described in claim 1, whereby when said electrical "piggyback" plug/socket assembly is inserted in series with an auxiliary switched electrical wall outlet and the electrical plug of a load, power interruption by said wall outlet's switch directs said remote control switch/relay circuit in claim 1 to a "closed" electrical position regardless of said remote switch/relay's position prior to said power interruption, thereby enabling said load plugged into said piggyback socket to always

return to a powered position when power is restored by said wall outlet switch (Figures 5, 7, col. 1, line 55+).

Response to Arguments

6. Applicant's arguments with respect to claims 3 and 4 considered but are moot in view of the new ground(s) of rejection. However, the Examiner wants to further clarify his position.

Applicant argues that none of the cited references use a single piggyback plug/socket assembly or a single three conductor cord for interconnection. As indicated in the above 35 U.S.C. 102 rejection, applicant's attention is directed to Platzer's Figure 7.

In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., safer, ease of installation, less confusing, etc..) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

In response to applicant's arguments of unexpected results, evidence of secondary considerations, such as unexpected results and commercial success, is irrelevant to 35 U.S.C. 102 rejections and thus cannot overcome a rejection, MPEP^f2134.04.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2836

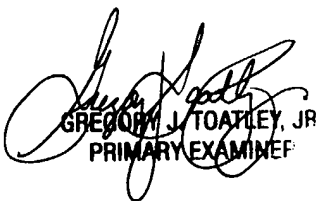

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
